## ACS

**Certificate of Sanitary Conformity.**  
All DELABIE products conform to the CPDW\* directive modified 29/05/1997, and the French Ministry of Health circular DGS/SD7A2002 no. 571 dated 25/11/2002.

\* Construction Products in Contact with Drinking Water (European Commission).

NEW

## DELABIE's commitment!

### DELABIE PRODUCTS HAVE A 30-YEAR WARRANTY!

DELABIE products are designed to last for as long as possible.

The quality of our products is such that we have no hesitation in **guaranteeing our products for 30 years\***.

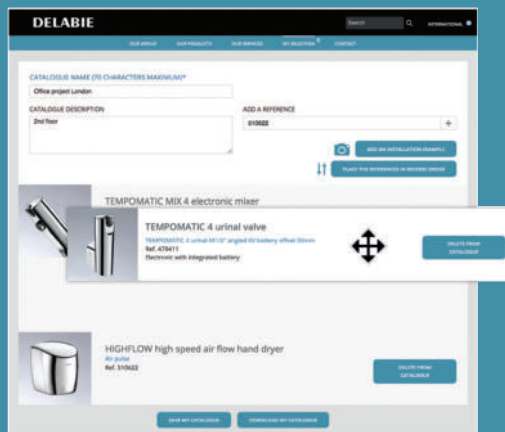

### DELABIE PRODUCTS CAN BE REPAIRED FOR 50 YEARS!

We will keep **spare parts** for our products for **50 years\*** to facilitate any necessary repairs.

DELABIE is helping to minimise your costs and prolong product lifespans, thereby reducing your ecological footprint.

\* See Terms and Conditions of Sales from 1<sup>st</sup> January 2024

## DELABIE.COM AVAILABLE FEATURES

Create your own catalogue using **your own product selection**.

You can **personalise** it by giving it a project name and description, by choosing the order for the products to appear and by adding lifestyle images.

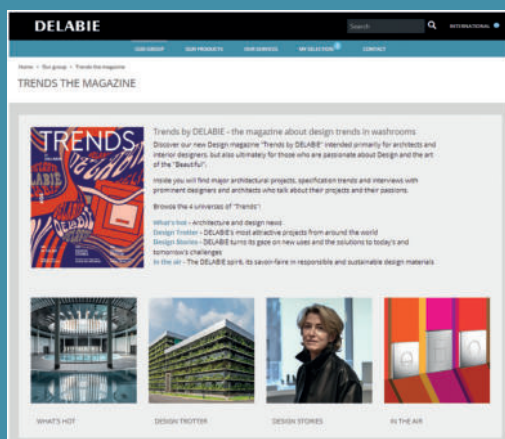

This catalogue will then be available in **Word, PDF and Excel** formats.

## BIM: DELABIE'S CORE PRODUCTS ARE NOW AVAILABLE

To meet the requirements of BIM technology, DELABIE has modelled its core products.

**BIM files** can be downloaded via the relevant product data sheet or via datashare.

## TRENDS THE MAGAZINE: THE DESIGN TRENDS TAB

Browse the "Trends by DELABIE" magazine intended for those who are passionate about Design and the art of the "Beautiful".

Discover the 4 universes of "Trends" with major international projects, specification trends as well as interviews with prominent designers and architects who talk about their projects and their passions.

## SPECIFICALLY DESIGNED FOR INTENSIVE, PROFESSIONAL USE

Subject to intensive use in professional kitchens, the catering industry and for fish preparation, etc., pre-rinse sprays must be robust and reliable. Specifically designed to withstand high stress loads, DELABIE's pre-rinse sprays are also functional, easy to handle, and ensure effective filling and cleaning.

### Increased durability and endurance

All DELABIE's pre-rinse sprays are quality-controlled and tested under extreme conditions to ensure their durability. They are ideal for intensive use, particularly during busy periods in the kitchen.

#### Long Life valve head

Thanks to its exclusive quality features, DELABIE's water-free guided valve head - specifically designed for intensive use - provides the mechanism with enhanced durability and a smooth operation (see page 24).

#### Extremely robust spout and ball levers

Unlike most spouts available on the market, the spout mechanism used for the Commercial Kitchen range for intensive use is manufactured from a piece of solid brass which makes it extremely robust. DELABIE's spouts are 1.25mm thick, ensuring better resistance to knocks from pans.

The ball levers are shock-resistant, specifically designed to withstand impacts.

#### High performance flexible hose

The flexible hose on the pre-rinse assembly is made from PVC reinforced with a braided interior. It will withstand pressure up to 5 bar and temperatures up to 70°C.

It has a stain-resistant coating, stainless steel hose crimps and a PVC sheath on the stress area, and an anti-torsion rotating nut.

#### Reliable

DELABIE's pre-rinse sprays are fitted with extremely reliable mechanisms. They are made from scale and corrosion resistant materials.

The mechanisms will withstand the high temperatures in professional kitchens, which can reach 90°C.

### User comfort

#### Ergonomic ball levers

The Bakelite ball levers are easy to operate.

#### Practical spouts

The raised spouts can swivel, allowing large pans to be placed beneath for filling. Work surfaces are therefore freed up for greater freedom of movement.

### Rapid-fill and effective cleaning

The pre-rinse sprays fill pans and plunge sinks quickly. Thanks to the rapid-turn valve head, full flow rate is achieved within the first 90°. Outlet flow rates up to 25 lpm at 3 bar are available, depending on the mixer.

The shape and intensity of the hand spray jet can be adjusted: rain effect for rinsing dirty dishes and a concentrated jet to remove baked-on food.

### Maximum hygiene

#### Hand spray nozzle with no grid

The hand sprays are fitted with a scale-resistant diffuser (the nozzle has no grid) reducing water retention, impurity build-up and preventing the spread of germs.

Made from Hostaform® (a scale-resistant material), DELABIE's flow straightener reduces scale build-up and ensures the quality of the water jet, maintaining a laminar flow over time. It reduces the frequency of descaling.

#### Food-grade flexible hose

Made from high-performance, food-grade quality PN 10, the flexible hose assembly is smooth, reducing the risk of bacterial development and facilitating cleaning. In addition, it conforms to European directive 2007/19/CE regarding "materials [...] intended to come into contact with foodstuffs".

#### Column and spout with smooth interior

The column and spout have a smooth interior which limits bacterial adherence and growth.

## AND ALSO...

### Easy to maintain

Spare parts are standardised so that maintenance staff can quickly and easily exchange them.

**30-year warranty** against any manufacturing defects.  
**50 years repairability.**

Single hole pre-rinse set with mixer **5625**

## Single hole pre-rinse set with mixer

Tubular spout

- Complete pre-rinse set with  $\frac{3}{4}$ " brass column.
- Deck-mounted single hole mixer with slimline control lever. Supplied with  $F\frac{3}{8}$ " flexible connectors and non-return valves.
- Bib tap with:
  - **Swivelling, tubular spout** L. 200mm.
  - 16 lpm full flow rate achieved within the first 90°.
  - **Valve head with reinforced mechanism** and ergonomic control lever.
- **Black, scale-resistant M $\frac{1}{2}$ " hand spray with adjustable jet.**
- Black, reinforced, food-grade flexible hose L. 0.95m.
- Adjustable wall bracket.
- Stainless steel spring guide.
- 30-year warranty.

## SPECIFICALLY DESIGNED FOR PROFESSIONAL USE

### Increased durability and endurance

All DELABIE's pre-rinse sprays are quality-controlled and tested under extreme conditions to ensure their durability under stress.

### Water-free valve head

Thanks to its exclusive quality features, DELABIE's water-free valve head, that is fitted to the Commercial Kitchen range, provides **the mechanism with enhanced durability and a smooth operation**: no sign of wear after **200,000 operations** (see page 34).

### Robust spout

The Commercial Kitchen range of spouts for professional use is provided with reinforced fixings for the base which ensures the spout is held in place correctly.

DELABIE's telescopic spouts are robust, ensuring better resistance to knocks from pans.

### High performance flexible hose

The flexible hose on the pre-rinse assembly is made from PVC reinforced with a braided interior. **It will withstand pressure up to 5 bar and temperatures up to 70°C**. It has a stain-resistant coating, stainless steel hose crimps and a **PVC sheath** on the stress area, and an anti-torsion rotating nut.

### Reliable

DELABIE's pre-rinse sprays are fitted with **extremely reliable mechanisms**. They are made from **scale and corrosion resistant** materials.

The mechanisms will withstand the high temperatures in professional kitchens, which can reach 90°C.

### User comfort

The rapid-fill spout is **telescopic and can swivel**, allowing large pans to be placed beneath for filling. Works surfaces are therefore freed up for greater freedom of movement.

### Rapid-fill and effective cleaning

The pre-rinse sprays fill pans and plunge sinks quickly. Outlet flow rates up to 25 lpm at 3 bar are available, depending on the mixer.

The shape and intensity of the hand spray jet can be adjusted: **rain effect** for rinsing dirty dishes and a **concentrated jet** to remove baked-on food.

### Maximum hygiene

#### Hand spray nozzle with no grid

The hand sprays are fitted with a **scale-resistant diffuser** (the nozzle has no grid) reducing water retention, impurity build-up and preventing the spread of germs.

Made from Hostaform® (a scale-resistant material), DELABIE's flow straightener reduces scale build-up and ensures the quality of the water jet, maintaining a laminar flow over time. It reduces the frequency of descaling.

#### Food-grade flexible hose

Made from high-performance, food-grade quality PN 10, the flexible hose assembly is smooth, reducing the risk of bacterial development and facilitating cleaning. In addition, it conforms to European directive 2007/19/CE regarding "materials [...] intended to come into contact with foodstuffs".

## SPECIFICALLY DESIGNED FOR INTENSIVE, PROFESSIONAL USE

Subject to intensive use in professional kitchens, the catering industry and for fish preparation etc., mixers and taps must be robust and reliable. Specifically designed to withstand intensive use, DELABIE's mixers and taps for Commercial Kitchens are also functional, easy to handle, and ensure effective filling.

### Increased durability and endurance

All the mixers and taps in DELABIE's Commercial Kitchen range are quality-controlled and tested under extreme conditions to ensure their durability. They are ideal for intensive use, particularly during busy periods in the kitchen.

### Long Life valve head

Thanks to its exclusive quality features, DELABIE's water-free guided valve head - specifically designed for intensive use - provides **the mechanism with enhanced durability** and a **smooth operation** (see below).

### Extremely robust spout and ball levers

Unlike most spouts available on the market, the spout mechanism used for the Commercial Kitchen range for intensive use, is **manufactured from a piece of solid brass** which makes it extremely robust. DELABIE's spouts are **1.25mm thick**, ensuring better resistance to knocks from pans. The **ball levers** are **shock-resistant**, specifically designed to withstand impacts.

### Reliable

DELABIE's mixers and taps are fitted with **extremely reliable mechanisms**. They are made from **scale and corrosion resistant** materials.

The mechanisms will withstand the high temperatures in professional kitchens, which can reach 90°C.

### User comfort

#### Ergonomic ball levers

The Bakelite ball levers are easy to operate.

#### Practical spouts

The spouts can **swivel**, allowing large pans to be placed beneath for filling.

### Rapid-fill

Thanks to the rapid-turn valve head, **full flow rate is achieved within the first 90°** for mixers with ≤ 60 lpm flow rates and in ½ turn for mixers with a 100 lpm flow rate.

Mixers and taps with high flow rates fill pans and plunge sinks quickly.

### Maximum hygiene

The smooth spout interior reduces the risk of bacterial development. The spouts are fitted with a brass, star-shaped flow straightener which reduces scale build-up and ensures the quality of the water jet, maintaining a laminar flow over time.

## AND ALSO...

### Easy to maintain

Spare parts are standardised so that maintenance staff can quickly and easily exchange them.

**30-year warranty** against any manufacturing defects.  
**50 years reparability.**

## EXCLUSIVE QUALITY FEATURES OF THE VALVE HEAD WITH REINFORCED MECHANISM

Deck-mounted single hole mixer **5610**

## Deck-mounted single hole mixer - 100 lpm

- Swivelling, tubular spout Ø 22mm H. 315mm L. 300mm.
- Star-shaped, brass flow straightener.
- Water-free, guided valve heads with reinforced mechanisms.
- Shock-resistant, ergonomic ball levers.
- Flow rate 100 lpm at 3 bar, suitable for plunge sinks.
- Full flow rate achieved within ½ turn.
- Spout with smooth interior.
- Chrome-plated brass body and spout.
- Soldered copper pipe water inlets.
- Reinforced fixing.
- 30-year warranty.

5610

Single hole mixer with extension column **5612**

Stainless steel SXS electronic hand washbasin **184320** - Wall-mounted paper towel dispenser **510601S**

### Deck-mounted single hole mixer - 100 lpm

Mixer with extension column

- **Swivelling, tubular spout** Ø 22mm H. 650mm L. 300mm.
- Star-shaped, brass flow straightener.
- **Water-free, guided valve heads with reinforced mechanisms.**
- **Shock-resistant, ergonomic ball levers.**
- **Flow rate 100 lpm** at 3 bar.
- Full flow rate achieved within ½ turn.
- **Spout with smooth interior.**
- Chrome-plated brass body and spout.
- Soldered copper pipe water inlets.
- Reinforced fixing.
- 30-year warranty.

This model is ideal for installation on stove tops.

5612

### Deck-mounted twin hole mixer - 100 lpm

Mixer on pillar mounts

- Deck-mounted mixer, M¾" with 150mm centres.
- **Swivelling, tubular spout** Ø 22mm H. 380mm L. 300mm.
- Star-shaped, brass flow straightener.
- **Water-free, guided valve heads with reinforced mechanisms.**
- **Shock-resistant, ergonomic ball levers.**
- **Flow rate 100 lpm** at 3 bar, suitable for plunge sinks.
- Full flow rate achieved within ½ turn.
- **Spout with smooth interior.**
- One-piece body and spout made from chrome-plated brass.
- Recessed inlets.
- Reinforced fixing.

Water-free valve head

Robust spout

## SPECIFICALLY DESIGNED FOR PROFESSIONAL USE

DELABIE's Commercial Kitchen controls have a level of quality that is ideally suited to commercial catering: restaurants, snack bars, caterers, etc.

### Increased durability and endurance

All DELABIE's Commercial Kitchen controls are quality-controlled and tested under extreme conditions to ensure their durability under stress.

#### Water-free valve head

Thanks to its exclusive quality features, DELABIE's water-free valve head, that is fitted to the Commercial Kitchen range, provides the **mechanism with enhanced durability** and a **smooth operation**: no sign of wear after **200,000 operations** (see below).

#### Robust spout

The Commercial Kitchen range of spouts for professional use, is provided with reinforced fixings for the base which ensures the spout is held in place correctly.

DELABIE's spouts are **1.25mm thick** ensuring better resistance to knocks from pans.

### Maximum hygiene

The smooth spout interior reduces the risk of bacterial development.

The spouts are fitted with a star-shaped flow straightener which reduces scale build-up and ensures the quality of the water jet, maintaining a laminar flow over time.

### Reliable

DELABIE's mixers and taps are fitted with **extremely reliable mechanisms**. They are made from **scale and corrosion resistant** materials.

The mechanisms will withstand the high temperatures in professional kitchens, which can reach 90°C.

### User comfort

#### Rapid-fill

The full flow rate is achieved within ½ turn of the valve head. Depending on the mixer or tap chosen, the flow rate can go up to 45 lpm at 3 bar.

#### Practical spouts

The spouts can **swivel** or they can be retracted (**telescopic spouts**), allowing large pans to be placed beneath for filling.

## AND ALSO...

### Easy to maintain

Spare parts are standardised so that maintenance staff can quickly and easily exchange them.

**30-year warranty** against any manufacturing defects.  
**50 years repairability.**

## EXCLUSIVE QUALITY FEATURES OF THE VALVE HEAD WITH CONTROL KNOB

**STAINLESS STEEL FIXING SCREW**  
perfect tightening  
will not corrode over time

**ULTRAMID® ANTI-FRICTION WASHER**  
thermoplastic material eliminates metal/metal friction

**LONG LIFE FOOD GRADE GREASE**  
**PRECISION MANUFACTURING**  
reduced wear and smooth operation

**O-RING**  
allows mechanism to operate free from water

**BRONZE CIRCLIP WITH LUGS**  
easy to remove

**THREADED SHAFT AND LONG LENGTH NUT**  
improved guidance and valve movement

**REINFORCED VALVE HEAD**  
EPDM: elastomer is highly resistant to shocks (90 shores)  
recessed seat: minimal valve displacement and reduces vibrations (withstands impact of the seat)

Deck-mounted single hole mixer **5650T3**

# Non-contact controls

## ELECTRONIC CONTROLS 50

## KNEE OR FOOT-OPERATED CONTROLS 60

## SPOUTS 61

Hygiene and infection control

Reduced-stagnation solenoid valve

No manual contact

Water saving per use

## HYGIENE AND INFECTION CONTROL

### Opens/closes automatically with no manual contact

DELABIE's electronic mixers and taps are operated by active infrared detection.

Flow opens when the detector senses hands and shuts off automatically when hands are removed from the detection zone.

**No manual contact prevents the spread of germs by hand.**

### Anti-bacterial duty flush programme

If a mixer or tap is not used for prolonged periods, water stagnates in the pipework, favouring the development of bacteria (isolated points-of-use, facilities closed during holidays, etc.).

DELABIE's electronic mixers and taps have a duty flush programme.

**An automatic flush takes places for approximately 60 seconds every 24 hours after the last use** (can be programmed on some models).

### Reduced-stagnation solenoid valve

Most solenoid valves are fitted with a rubber membrane behind which water stagnates and is not renewed. This can lead to bacterial proliferation.

DELABIE has developed a technology without a membrane (patented system).

With this **piston-operated solenoid valve**, water is drained and renewed with every use **which reduces bacterial development**.

The solenoid valves' self-cleaning system with a calibrated groove reduces the build-up of dirt. Furthermore, its slow closure eliminates water-hammer.

## 90% WATER AND ENERGY SAVINGS

### Water savings

Compared to conventional mixers and taps, DELABIE's electronic mixers and taps can offer maximum water savings. They ensure the manager's water bills can be reduced whilst preserving user comfort.

### • Automatic shut-off and split delivery

**The mixer or tap shuts off automatically when hands are removed from the detection zone.**

This removes the risk of waste through negligence.

The anti-blocking security system activates to prevent the mixer or tap from flowing continuously. The flow time is reduced to the necessary minimum (wetting, rinsing).

### • Flow rate regulated at 3 lpm

DELABIE's electronic mixers and taps are regulated at **3 lpm**. The flow rate remains constant regardless of pressure variations in the system. The flow rate can be adjusted from 1.4 - 6 lpm.

### Energy savings

Electronic mixers and taps do not require much energy to operate. On the battery-operated models, DELABIE has chosen infrared active pulse technology, **a low-power consumption solution**.

The infrared beam is emitted intermittently saving energy while ensuring effective detection.

Battery-operated models have an average lifespan of **350,000 cycles** (i.e. 3 to 6 years) depending on the frequency of use. The Lithium batteries are widely available, affordable and recyclable. The significant **hot water savings** provided by DELABIE's mixers and taps also result in energy savings.

### Environmental labels

The water and energy saving performance of DELABIE's electronic controls means that the buildings achieve the highest performance standards for international rating schemes such as BREEAM, LEED or HQE.

## SPECIFICALLY DESIGNED

### Easy to install

DELABIE's products are **easy to install and adjustments are kept to a minimum** in order to save time during installation.

### • Independent electronic control unit: BINOPTIC, TEMPOMATIC 2 and TEMPOMATIC PRO models:

Depending on the model, there is an option to adjust the presence detection distance, to change the operating mode (ON/OFF or automatic) and change the duty flush settings.

The electronic control units are waterproof (IP65) with diagnostic LEDs to facilitate servicing.

### • Electronic unit and solenoid valve integrated in the body of the mixer/tap\*: TEMPOMATIC 4 and 5 models:

**Can be installed on any isolated point-of-use, for new builds as well as renovation.**

### - 6V Lithium batteries\*:

There are no electrical connections required. Simply connect the flexibles to the supply pipes in the same way as for a conventional mixer/tap. No special adjustment is necessary; the mixer/tap is ready to operate independently for 3 to 6 years. A red LED will flash for 15 days to indicate that the battery life is low. The battery can be changed without shutting off the water supply or removing the mixer/tap.

The batteries are directly accessed through the head of the tap (TEMPOMATIC 4) or via a battery pack attached to the flexibles (TEMPOMATIC 5).

### - 230/6V mains (plug-in or recessed)\* :

To operate, simply connect the flexibles to the supply pipes and connect the electrical supply to the mixer/tap via a plug and socket or recessed connection close to the basin. This does not require any specific maintenance (no battery changes).

\* Depending on the model.

**30-year warranty** against any manufacturing defects.  
**50 years reparability.**

TEMPOMATIC 4

Electronic mixer and tap, battery or mains operated

- 230/6V mains supply or integrated CR123 6V Lithium batteries.
- Reduced-stagnation solenoid valve and electronic unit integrated into the body of the mixer/tap.
- Flow rate pre-set at 3 lpm at 3 bar, can be adjusted from 1.4 - 6 lpm.
- Scale-resistant flow straightener.
- Duty flush (~60 seconds every 24 hours after last use).
- Active, infrared presence detection, sensor at the end of the spout optimises detection.
- Chrome-plated stainless steel body.
- Cap fixed in place by 2 concealed screws.
- PEX flexibles with filters and non-return valves.
- Fixing reinforced by 2 stainless steel rods.
- Anti-blocking security.
- Side temperature control with adjustable maximum temperature limiter on mixers.
- 30-year warranty.

Electronic mixer or tap, battery or mains operated

- Independent IP65 electronic control unit.
- 230/12V mains supply with transformer or battery-operated CR123 6V Lithium batteries.
- Flow rate pre-set at 3 lpm at 3 bar, can be adjusted from 1.4 - 6 lpm.
- Scale-resistant flow straightener.
- Adjustable duty flush (pre-set flush ~60 seconds every 24 hours after last use).
- Active, infrared presence detection, sensor at the end of the spout optimises detection.
- Chrome-plated brass body.
- Spout with smooth interior and low water volume (reduces bacterial development).
- PEX flexibles with filters and solenoid valves.
- Fixing reinforced by 2 stainless steel rods.
- Anti-blocking security.
- Side temperature control with adjustable maximum temperature limiter on the mixers.
- 30-year warranty.

## SXL hand washbasin

Foot-operated

- Floor-standing, foot-operated hand washbasin.
- Bacteriostatic 304 stainless steel.
- Stainless steel thickness: 0.8mm.
- Supplied with swan neck spout and tap with 7-second time flow.
- Easy to maintain: access panel at the front.
- Supplied with 1¼" waste.
- Without overflow.
- Supplied with fixing elements.
- CE marked. Complies with European standard EN 14688.
- Weight: 10kg.
- 30-year warranty.

## SXS mechanical hand washbasin

Knee-operated

- Wall-mounted, knee-operated hand washbasin.
- Bacteriostatic 304 stainless steel.
- Stainless steel thickness: 0.8mm.
- Rounded edges prevent injury.
- Bare model (without tap) or complete model (with tap and premixer).
- Complete model consists of: swan neck spout, soft-touch tap with 7-second time flow and a premixer with non-return valves.
- Flat perforated waste, without screws: easy to clean and vandal-resistant.
- Without overflow.
- Water savings: flow rate pre-set at 3 lpm.
- Maximum hygiene: no manual contact with tap.
- Supplied with fixing elements.
- CE marked. Complies with European standard EN 14688.
- Weight: 4.3kg.
- 30-year warranty.

## SXS electronic hand washbasin

Electronic control

- Wall-mounted hand washbasin with electronic control.
- Bacteriostatic 304 stainless steel.
- Stainless steel thickness: 1.2mm.
- Rounded edges prevent injury.
- 184310 and 184320 references are supplied with an electronic mixer with integrated batteries and solenoid valves and a chrome-plated brass soap dispenser.
- 18431015 and 18432015 references are supplied with a WRAS approved electronic tap with integrated battery and solenoid valve, a TMV3 and WRAS approved thermostatic mixing valve and a chrome-plated brass soap dispenser.
- Supplied with 1 1/4" waste. Without overflow.
- Water savings: flow rate pre-set at 3 lpm.
- Maximum hygiene: no manual contact with tap, reduced stagnation solenoid valve, duty flush prevents bacterial development.
- Supplied with fixing elements.
- CE marked. Complies with European standard EN 14688.
- Weight: 4.1kg.
- 30-year warranty.

## Janitorial unit

Floor-standing

- Floor-standing janitorial unit.
- Complies with the former HTM64 guidance and new Health Building Note 00-10: Part C - Sanitary Assemblies (JU).
- Bacteriostatic 304 stainless steel. Stainless steel thickness: 1mm.
- Smooth surface for easy cleaning.
- Adjustable feet height up to 25mm.
- Easy to maintain: access panel at the front.
- Supplied with 1¼" waste for the basin and 1½" waste for the disposal sink.
- Without overflow.
- Hinged stainless steel bucket grid.
- CE marked. Complies with European standard EN 14688.
- Weight: 22kg.
- 30-year warranty.

Trigger-operated hand spray

With adjustable jet

- Trigger-operated hand spray with **adjustable jet** and shock-resistant protection.
- Ergonomic grip with protector is easy to grip.
- Internal mechanism will withstand chemical products.
- Flow rate: 23 lpm at 3 bar.
- Maximum temperature: 50°C.
- Maximum pressure: 12 bar.
- Trigger can be locked in open position thanks to an integrated collar.
- 30-year warranty.

433011

Trigger-op hand spray, adjustable jet	433011
---------------------------------------	--------

Scale-resistant hand spray with nipples

- Hand spray with **adjustable jet** and scale-resistant tip with nipples.
- Shock-resistant.
- **Two jet options:** rain effect and concentrated jet set at 10 lpm at 3 bar.
- **Reinforced polypropylene** handle with non-slip grip for improved grip.
- Chrome-plated solid brass.
- Hand spray can be locked in open position via a simple click.
- 30-year warranty.

433003

Provisional availability: 1<sup>st</sup> half 2025.  
Please contact sales office to check availability.

Scale-resistant hand spray with nipples	
White	433003
Black	433009

Hand spray with scale-resistant nozzle

- Hand spray with **adjustable jet** and shock-resistant tip.
- Scale-resistant diffuser (nozzle has no grid).
- **Two jet options:** rain effect at 8 lpm at 3 bar or concentrated jet at 9 lpm at 3 bar.
- **Reinforced polypropylene** handle with non-slip grip for improved grip.
- Chrome-plated solid brass.
- Hand spray can be locked in open position using integrated collar.
- 30-year warranty.

## ON/OFF waste

Waste with stainless steel valve

- Washbasin waste M $\frac{1}{4}$ " with stainless steel valve **with free flow**.
- Recommended for all washbasins equipped with electronic or time flow mixers/taps and washbasins with overflow.
- Open/close by simply pressing the top of the waste.
- 30-year warranty.

581000

### ON/OFF waste

**581000**

## HYGIÉNA waste

Waste with concave grid

- Hygienic washbasin waste M $\frac{1}{4}$ ".
- **Concave grid** (no water retention).
- **Free flow, with no central screw** (reduces bacterial development).
- Polished chrome-plated brass grid, chrome-plated ABS body.
- Tall version: tightens to a min. 1mm or max. 45mm; **pre-scored waste**: (snap-off sections can be removed for basins with overflow). Short version: tightens to a min. 1mm or max. 2mm; **special stainless steel washbasins**.
- Complies with EN 274-1. 30-year warranty.

611

## Copper tails

To supply mixers and taps

- Soft-tempered copper tails.
- Can be installed instead of PEX flexibles.
- Better conductors than flexibles.
- More effective for thermal shocks.
- Supplied in packs of 2.
- 30-year warranty.

**Pro tip:** don't forget to include non-return valves on the copper tubes if the PEX flexibles to be replaced have integrated non-return valves. Contact our Technical team for further information.

## Electronic soap dispenser

Battery-operated

- **Vandal-resistant model with lock and standard DELABIE key.**
- **No manual contact:** hands are automatically detected by infrared cell (detection distance can be adjusted).
- Cover made from **bacteriostatic 304 stainless steel**.
- **One-piece hinged cover** for easy maintenance and better hygiene.
- **No waste pump dispenser:** dispenses 0.8ml (can be adjusted up to 7 doses per activation).
- Option of operation in **anti-clogging mode**.
- Power supply: 6 AA -1.5V (DC9V) batteries supplied integrated in the soap dispenser body.
- Low battery indicator light.
- Tank with large opening: easy to fill from large containers.
- Window allows soap level to be checked.
- Capacity: 0.5 or 1 litre.
- Stainless steel thickness: 1mm.
- For vegetable-based liquid soap with a maximum viscosity of 3,000 mPa.s.
- Compatible with hydroalcoholic gel.
- 30-year warranty.
- CE marked.

## Liquid soap dispenser

With soft-touch operation

- **Vandal-resistant model with lock and standard DELABIE key.**
- Cover made from **bacteriostatic 304 stainless steel**.
- **One-piece hinged cover** for easy maintenance and better hygiene.
- **Push-button with soft-touch operation.**
- **Anti-blocking:** single dose per press even when the button is pressed for long periods.
- No waste, non-drip (waterproof) pump-action dispenser.
- Tank with large opening: easy to refill from large containers.
- Tank prevents long-term stagnation of soap.
- Window allows soap level to be checked.
- Capacity: 0.5 or 1 litre.
- Stainless steel thickness: 1mm.
- For vegetable-based liquid soap with a maximum viscosity of 3,000 mPa.s.
- Compatible with hydroalcoholic gel.
- 30-year warranty.

## PREMIX NANO

Thermostatic mixing valve

- To be placed upstream of the taps.
- **For 1 - 2 taps.**
- **Anti-scalding failsafe:** immediate shut-off if hot or cold water supply fails.
- Temperature pre-set at 38°C, can be adjusted by the installer from 34 - 60°C.
- Brass body.
- **Filters and non-return valves.**
- Recommended flow rate range from 3 - 12 lpm.
- **Thermal shocks are possible.**
- 30-year warranty.

Adjustable height floor trap

For tiles, concrete and vinyl floors

- Flow rate 36 lpm (meets standards).
- Water level 50mm.
- Bright polished stainless steel grid.
- Horizontal outlet (elbow not included) or vertical outlet integrated into the height of the floor trap (saves height and space in all dimensions).
- Integrated waterproof collar to seal waterproof membrane.
- Withstands high temperatures: 60°C continuous, 85°C peak.
- Plunger with handle: easy to grip and easy to clean.
- Smooth PVC body (no impurity retention).
- Classified non-flammable (American certification UL94).
- Height adjusts with extension.
- Grid fixed with 2 stainless steel screws.
- For hard floors (tiles or solid concrete) or soft (vinyl).
- 30-year warranty.

## WHAT IS THE NF MARK?

The NF Mark affixed on a product attests that the latter complies with the relevant standards and with complementary technical specifications requested by the market, where appropriate.

### • SANITARY WATER CONTROLS

The characteristics are specified in the technical documents, prepared with the participation of the manufacturers, the distributors, the consumer associations, the laboratories and the public authorities, fixed by AFNOR Certification and monitored by the "Centre Scientifique et Technique du Bâtiment" (CSTB) (Scientific and Technical Building Centre). CSTB carries out tests on the products and the audits on the companies as part of this application.

## WHAT DOES THE NF MARK ACCORD?

### > Sanitary water controls

The NF Mark – SANITARY TAPWARE certifies the compliance of products with the certification reference system approved by AFNOR Certification. In particular, this guarantees:

### > For automatic shut-off valves

- quality of the surface covering
- interchangeability of valves
- tightness before and after endurance test
- intercommunication between cold water and hot water
- flow rates appropriate to the application
- checking the flow time
- mechanical performances
- wear resistance for the control devices
- acoustic performances.

### > For mechanical mixers

- quality of the surface covering;
- interchangeability of mixer taps;
- tightness before and after endurance test;
- intercommunication between cold water and hot water;
- flow rates appropriate to the application;
- use comfort depending on the sensitivity, the precision and the temperature constancy;
- mechanical performances;
- wear resistance for the control devices;
- acoustic performances.

## HOW DOES ONE RECOGNISE AN NF PRODUCT?

To distinguish products that have been admitted to the NF Mark in the shops and during installation, the NF logo is affixed on the products themselves.

## THE NF MARK IS TO BE FOUND ON WHAT PRODUCTS?

The NF Mark is affixed on the following products:

### • SANITARY WATER CONTROLS

- single taps and mixer taps;
- mechanical mixer taps;
- thermostatic mixing valves;
- flow rate regulators;
- shower outlets for sanitary tapware;
- extractable handsprays for sink and washbasin mixer taps;
- shower hoses for sanitary tapware;
- waste fittings;
- automatic shut-off valves;
- stop valves mounted:
  - upstream from sanitary tapware;
  - on a WC flushing cistern;
  - to supply a washing machine;
- multiway selector;
- automatic diverter, Family H, type C;
- electronic opening and closing valve, and specifies the ratings for some of them.

## WATER REGULATIONS ADVISORY SERVICE

All sanitary fittings that deliver water from a public mains water supply must comply with the Water Supply (Water Fittings) Regulations (1999) or Scottish Byelaws. These fittings must be of an 'appropriate quality and standard' and must not contaminate the water or cause wastage. Products that are WRAS approved demonstrate this compliance and are recognised by all water suppliers in the UK.

## TMV3 SCHEME

The TMV scheme is an independent third party approval scheme administered by NSF International. The TMV3 scheme certifies that products comply with performance requirements of the UK Department of Health's HTM 04-01: Supplement Performance Specification D08 in healthcare and commercial applications in the UK.

NSF International also certifies Type 2 thermostatic mixing valves comply with the requirements of European standards EN 111 and EN 1287.

## ACS

**ACS:** All DELABIE products comply with the French CPDW directive and the 29 May 1997 decree modified by the Ministry of Health DGS/SD7A2002 number 571 of 25 November 2002.

### CE certification

for electronic taps and valves: directives 2014/30/UE and 2014/35/UE.

### NF EN certification:

French and European standards  
NF EN 816  
NF EN 817  
NF EN 1111

### NSF TMV3 scheme

### ISO certification ISO 9001: 2015

Quality Management System

### Other certification:

DELABIE exports to over 90 countries worldwide.

**The general terms and conditions are valid for all customers.**

### ORDERS AND QUOTATIONS:

These will be processed in order of receipt.

We do not accept open orders or orders for call-off.

All orders sent imply acceptance of our general terms and conditions of sale and customers waive any claims that may arise from clauses in their own documentation which may differ.

The customer agrees to these terms from the moment that we receive the order, which cannot be cancelled. Orders are accepted without obligation to deliver the order in full in one delivery.

Our commercial representatives are not authorised to agree additional terms verbally, or to provide verbal guarantees beyond those provided in the written contract.

In the event of default or delayed payment, the Company will be entitled to suspend deliveries or cancel existing orders without any claim for damages from the customer.

In the event of a change in circumstances of the buyer, we reserve the right to cancel existing orders or to demand payment guarantees.

Our quotes do not amount to specifications; specifiers and professional installers are solely responsible for the choice of products according to their intended use, current regulations and recommended guidelines.

### PRICE:

Deliveries are invoiced according to the conditions in place at the date of despatch. Prices are given without guarantee and they may be changed without notice subject to fluctuations in costs, VAT or other taxes, according to the prevailing economic conditions. Price increases will be announced one month prior to their application, and they apply to quotes and orders in hand.

### PAYMENTS:

Terms of payments are confirmed when an account is opened, and are dependent on the terms of our credit insurance, and according to each country.

We do not give discount for early payment.

In accordance with Article L441-6 of the Commercial Code, any delay in payment will give rise to the following from the first day of delay, regardless of their status with the supplier:

- An interest rate for delayed payment will be applied, equal to the European Central Bank refinancing rate plus 10% (French Law of Modernization of the Economy - LME – No. 2008-776 of 4th August 2008);
- A one-off payment of 40 Euros will apply to cover expenses (European Directive 2011/7 of 16th February 2011, Law 2012-387 of 22nd March 2012, and Decree 2012-1115 of 2nd October, 2012);
- When the recovery costs exceed the amount of the one-off payment, additional compensation will apply where justified.

In the case of late payment, a one-off payment may be required, replacing existing conditions. We will not accept any set off, only our assets have a legal value.

### DELIVERY TIMES:

Despatch dates are indicative only and we shall not be liable for any delay or failure in carrying out our obligations where the delay or failure to deliver is caused by risks of manufacturing or where the cause is beyond our control. Delivery delay will not give rise to compensation payment or goods rejection.

### SHIPPING:

Orders are sent to our distributors. We do not deliver to site. Charges and risks incurred from the transfer of merchandise depend on the Incoterm used for the commercial transaction. The carrier is solely responsible for their delivery, and in the event of delay, missing items, damage or other dispute, the customer must indicate this via the delivery driver's paperwork (either electronically or in hard copy) AND follow up with written notification sent by recorded delivery within 72 hours. A copy of this letter must be addressed to us.

### CLAIMS:

No claim will be allowed where the delay in reporting exceeds 7 days following receipt of the goods.

The whole of the delivery cannot be rejected because of partial damages and shortages.

### PROPERTY IN GOODS:

Notwithstanding any agreed terms of sale, the goods shall remain the property of the seller until payment is made in full. The failure to meet a payment deadline may result in the reclamation of these goods.

The buyer assumes the risks of loss or damage, regardless of the means of delivery, as described in 'DELIVERY TIMES' and 'SHIPPING' above, as well as liability for the damage they might cause.

### WARRANTY AND RESPONSIBILITY:

Our finished goods delivered after 1<sup>st</sup> January 2024 are warrantied against any manufacturing defect for a period of 30 years, including electronic controls, excluding other electrical accessories (e.g., hand dryers, etc.) which have a 3-year warranty from the invoice date. This does not apply to products with an expiry date. Spare parts have a one-year warranty.

This warranty is limited to replacement or repair of defective components as determined by our workshops in France but excludes the costs of spoilage, handling and carriage or compensation whatever they are. We are not responsible for handling charges and the cost of returning products to our workshops.

Disasters or major water damage as a result of manufacturing defects are covered by our product and/or public liability insurance.

To invoke the warranty, the customer must immediately notify us in writing of the defects attributed to the product, specifying the conditions of use in place at the time of their discovery and provide us with all relevant material elements demonstrating the existence and nature of the defect.

Our warranty and responsibility does not include the following:

- installation that does not comply with the technical specification or current

recommended guidelines;

- worn parts;

- non-compliance with installation, user and maintenance guides;

- other factors independent of our products' quality, for example: detergents or abrasive cleaning products, the action of hard water, foreign bodies (e.g., gravel, sand, iron filings, scale, etc.), chemical and electrolytic phenomenon;

- lack of supervision, poor storage or poor maintenance;

- product modifications or actions by the customer, or a third party, without our authorisation using non-DELABIE components and/or consumable items.

- errors, carelessness, negligence or incorrect information from the client;

- products past their expiry date.

The water-tightness of connections, joints and the product housing is the responsibility of the professional responsible for installation, and must be guaranteed by them. Warranty excludes joints, valves, washers and rubber seals. However, they would be supplied if the warranty application requires them. Any finishes other than chrome or nickel are also excluded from the warranty.

In the event that the product has been discontinued or manufacturing methods have changed and replacements are not available, similar alternative products will be offered. Replacement under warranty will not extend the duration of the original warranty.

The supplier's civil liability is excluded in all cases listed above. It is limited to compliance with the specifications and can only be initiated if the Customer has previously demonstrated the existence and extent of damage, a fault and the causal link between this fault and the damage.

It is limited to direct material damage, excluding all immaterial or indirect damage such as loss of operation, profit, opportunity, commercial damage, loss of earnings.

The supplier's liability, for all causes except bodily injury and gross negligence, is limited to €750,000 per order or contract.

### SPARE PARTS:

Spare parts and mechanisms that are essential to ensure the correct operation of our products will be held in stock for 50 years from the date of purchase. They are listed at the back of our catalogues.

### RETURNS:

Goods may not be returned to us for credit without our prior written approval obtained by the buyer from the Company and they are received in a good state (determined by our goods inwards department). All transportation costs for returned goods must be paid by the buyer. Goods must be returned to our factory\* with good protective packaging.

Deliveries less than a month old will be refunded at the invoiced price. For deliveries older than one month, a deduction will be made for checking, handling and administration costs. A repair and re-estimation fee will apply where appropriate.

Product returns are not permitted in the following circumstances: discontinued products, specially manufactured products, technical or aesthetic evolution of the product since the date of purchase, scratched or damaged products, products purchased more than one year previously, products with an expiry date. If sent to DELABIE, those products outside the scope of returns will be immediately destroyed/recycled, and will not be returned to the customer.

The schedule of standard deductions is as follows:

- return less than 1 month: refund at invoiced price
- return between 1 and 3 months: deduction of 15%
- return between 3 months and 1 year: deduction of 30%
- return after 1 year: no refund possible.
- return without prior agreement: additional deduction of 5% of the value of the goods with a minimum value of €50 excl. VAT.

#### **CLEANING - MAINTENANCE:**

Clean with slightly soapy water only, using a soft cloth or sponge, rinse and dry thoroughly. Do not use abrasive or chlorine-based products (with a hydrochloric acid base), or dyes.

#### **PHOTOGRAPHS AND DRAWINGS:**

All photos, drawings or illustrations are for illustrative purposes only, without contractual obligation, and may be subject to change without notice.

We reserve the right to modify designs and dimensions without notice and without recourse. This applies to all references, dimensions, information contained in various documents, catalogues, installation guides, price lists and websites, which can be modified or discontinued at any time without notice.

#### **INTELLECTUAL PROPERTY AND USE OF CONTENT:**

The content (including but not limited to the information, text, graphics, data, images, photos, visuals, videos and soundtrack, and the format of all these elements and our catalogues, websites, etc.) are protected under copyright and/or other intellectual property. The contents are the sole property of their respective editors. Any copying, reproduction, use, adaptation, alteration, modification, translation, dissemination, complete or partial, of content, whether they belong to DELABIE or a third party which has granted the rights to DELABIE, by any means whatsoever, is illegal except for the limiting rights that are granted below, and/or private copying for the exclusive use of the copier. The content presented in our communication and business tools may be subject to change without notice and are provided without warranty of any kind, express or implied, and cannot give rise to any right to compensation. Protected content may be specifically identified by the following copyright notices: © or "All rights reserved".

The names and logos appearing in our catalogues and websites are registered trademarks. These distinctive marks are the exclusive property of DELABIE or third parties who have granted the rights to DELABIE. Any use, complete or partial reproduction, or imitation of these marks is prohibited without prior express consent of DELABIE.

Alteration and modification of the contents or their use for any purpose other than that authorised, constitute an infringement of DELABIE's, or a third party's, property rights. With the following limitations, DELABIE grants you the right to download and distribute the content:

- where the download function exists
  - for non-commercial purposes
  - in good faith
  - for maintaining the proprietary notices intact, and for the publication or posting of existing content online, if such information is stated.
- This right should in no way be interpreted as a trademark or copyright license for the aforementioned content.

#### **PERSONAL DATA PROTECTION:**

In line with the General Data Protection Regulation (GDPR), DELABIE is doing everything necessary to limit to a bare minimum the collection of personal data, and its conservation and ensure its protection.

DELABIE only uses this data for its own use for purposes of information and commercialisation of its products. It is not, under any circumstances, given to third parties.

The right of access, rectification, removal and opposition to the processing in addition to the limitation and transferability of your data is possible on request to our Data Protection Officer (DPO) at DELABIE via email (dpo@delabie.fr) or recorded delivery with a photocopy of a photo ID to the following address: DELABIE, 18 rue du Maréchal Foch, 80130 Friville Escarbotin – FRANCE.

To improve our services and for training purposes, calls to DELABIE may be recorded. These recordings will not be retained, and will be systematically deleted within a maximum period of 48 hours.

#### **EXCLUSIVE TERRITORIES:**

In most countries throughout the world, our company has entered into exclusive agreements with organisations to import and distribute our products. Within this framework, our clients cannot sell our products outside their national borders without an express prior agreement on our part.

#### **JURISDICTION:**

Acceptance of an order delivered from France settles the contract under the French law. All disputes arising from the present contract will be settled definitively by the Court located in the area of our domicile, even in the event of multiple defendants, regardless of the delivery location or stipulated payment. All clauses to the contrary will be considered null by the mere fact of having dealt with our company.
